Titanium Blockchain
INFRASTRUCTURE SERVICES

ANNOUNCEMENT
Titanium reduces hard cap.

Reduction of the hard cap
After discussing the matter with several serious investment groups and a third-party company, doing a deep-dive audit on Titanium, we have decided to reduce our hard cap from 100 million Titanium BAR tokens to 35 million, in order to make the Titanium pre-sale and ICO more attractive to both investors and strategic clients.

And, just like that... just as the CEO of the BBB promised, here comes the official press release from the Better Business Bureau.

(2) Touching Base

Michael

I do PR and communications for the BBB of Los Angeles & Silicon Valley. I understand your company recently become an Accredited Business, and we'd like to pull out an announcement. Let me know if you have some time next week to discuss an action plan.

Thanks,
John

Titanium is first-to-market. We can promise 99.99% uptime and will provide the same products as Amazon Web Services, HPE Helion, IBM Cloud Storage, Microsoft Azure and RackSpace at at least half the cost.

Hello Everyone!

We have a lot of exciting announcements to cover in this week's edition of TBIS Weekly. From our Vordex Exchange to t-shirts, the Titanium team is pleased to bring you installment three of TBIS Weekly! As always, we have selected frequently asked questions from our submissions form for the Titanium team to answer. We would like to remind everyone that the Community Voice section is your chance to submit questions that we may not normally have time to answer within our social media groups. Thank you to all our community members who participated this week.

Submit questions for next week here

Voting Results

We want to say thank you to the whole community for voting for our rebranded logo. We loved all three and needed your help to pick one that would allow us to stand out. You certainly delivered and we are proud to announce Option Three won!

Below is the winning logo

Titanium is proud to present VORDEX! We have announced the name for our DEXchange and development is already underway. We could not be more excited about the future of this product. TBIS will be working closely with our partners at ProjectPOMA to ensure the success of VORDEX. More specifically, ProjectPOMA will be focusing on the exchange's back engineering while our team at Titanium directs the vision.

Everything that was promised within our DEXchange will be implemented into VORDEX, with some ingenious improvements from the mind of our COO, Richard Silver, and other industry specialists.

Revised Whitepaper

At long last, Titanium's revised Whitepaper is ready for release! This updated version includes a complete overall vision of Titanium's closed ecosystem and products. This WP includes additional detail, missing sections, and a revamped design. We know that this is a small, but important, piece of the puzzle for Titanium's future and our community of TBAR token holders.

Although this version of the Whitepaper is more technical, it does not, and will not go into explicit underlying technical detail. Much of the architecture is proprietary at this time, with patents in the works.

Please enjoy our Whitepaper here

Community Voice

Q: In last week's edition you stated that the total circulating supply of TBAR was 43 million. Why has this changed from the original ICO amount of 35 million?

A: As outlined in the whitepaper we had various BAR token distributions. Sign up for example we had bounty, airdrops, and marketing (that all went down) it.com) with ICO. There was a slight TBAR loss due the theft because TBIS honored some stolen BAR purchases that occurred before the fork.

-Michael Stollaire, CEO

Q: Now that Richard is an Advisor for BitFence, will this benefit TBIS in any way? Furthermore, what is Richard's role within BitFence and how much time will he be spending advising for them?

A: BitFence is a great project that is security focused. We may have bigger news regarding them in the coming weeks. I'll be advising them on some business strategy and helping them with their release scheduling, as well as other input they request. In a typical day I work 12-16 hours for TBIS. The way I see it there are 8-12 more hours each day I'm able to shift around to help guide BitFence.

- Richard Silver, COO

Q: With the 'as a service' platform expanding, in theory what other types of normal physical hardware can be deployed 'as a service'? Is it similar, identical, different, or more than what I would see on Azure?

A: Our Infrastructure as a Service will grow to allow just about any type of computer hardware to run in a decentralized fashion. All of the other 'aaS' implementations will run on top of IaaS. Our IaaS differs from Azure in that Azure's services run in centralized data centers.

- Dan Berezcki, CTO

[\(/trending/cryptocurrency\)](/trending/cryptocurrency)

<https://steemit.com>

Q: Where and when will I be able to purchase Titanium merchandise?

A: Currently we are working hard to stock up on newly designed merchandise, so you can expect these to be available next month. These will go up for sale on our website.

- Dan Steel, Merchandise Coordinator

Q: Titanium will be using a PoW masternode system. Do you believe that PoW is the future of cryptocurrency and why implement a tiered masternode system, what benefits does this have?

A: Titanium's masternodes are planned to be a hybrid of PoW and PoS. PoW doesn't scale well and will be limited to level that it can scale. Because of the scalability issues with PoW, I don't believe there will be many systems dependent on just PoW in the future.

Tiered masternodes allow for more than just the largest holders of TBAR to participate. The more you hold, the more you are rewarded which provides more incentive to buy and hold TBAR.

- Dan Berezcki, CTO

TBIS Weekly Anniversary Edition: IaaS Alpha, TBAR Targets E-Commerce, and Michael Stollaire! — Ste... Page 3 of 14

Welcome back to TBIS Weekly! This week we are celebrating TBISW's one month anniversary. Team Titanium has been working hard and would like to take this opportunity to thank our amazing community for their continued support and question submissions. Without you, our TBIS Weekly would not be possible. We believe wholeheartedly that Titanium has the best community, partners, team, and products in the blockchain space. Together, we are the revolution!

Voting Results

Last week we asked for votes on four t-shirt designs. This topic was highly debated in Telegram chat and, well, behind the scenes too. We appreciated participation in this vote as it allowed us to gain insight into what you want to see. We intend to keep the thoughts of our community members in mind as we create even more merch. Many voted, and two designs were close, however Option Three won. #TeamTitanium (/trending/teamtitanium) will be rocking these shirts at events and they will available to purchase via our merch store next month! A big thank you to our community for voting. Below is the winning design:

TBIS Weekly Anniversary Edition: IaaS Alpha, TBar Targets E-Commerce, and Michael Stollaire! — Ste... Page 5 of 14

During the hours, days, and weeks following the BAR token theft, TBIS's main Telegram channel grew to over twenty thousand members. We panicked and controlling rumors became an impossible task. As a result, TBIS staff could not communicate effectively and we were forced to ban those who would not cease their behavior. During this chaotic time, we are certain that some were banned on accident, and/or less tactfully than they deserved.

The time has come to move on from this unfortunate period in our company history and we would be most pleased for all of our supporters to join us again as we move forward onto better and bigger things.

*Next week, we will begin unbanning in our main Telegram channel;
<https://t.me/TbisOfficial> .*

We will do so over the course of a few days so that all admin and staff support will be available to answer questions and moderate respectfully. Our rules have been revamped making bans a last resort, and warnings/mutes for limited amounts of time will be a "go-to" for infractions. This will be a fresh start for all and we are greatly looking forward to it.

Titanium has recruited Yong Ha Jeong to be our South Korean Liaison! We are extremely excited to have Ms. Jeong aboard the Titanium team and cannot wait to see the positive direction she will take us. As the South Korean Liaison, she will be responsible for promoting Titanium and creating a positive presence for TBIS in one of the world's largest crypto markets. Immediately, she will be focusing on large South Korean exchanges, social media influencers, and keeping Titanium up to speed with trends in the South Korean crypto market in general.

Ms. Jeong's fascination with cryptocurrency and Blockchain technology came when she discovered an Andreas Antonopoulos lecture on Youtube in early 2017 about "unbanking the banked", "banking the unbanked" and what constitutes money. After that, she was hooked on the idea of digital

POMA's Turnkey Solution FAQ

TBIS Weekly Anniversary Edition: IaaS Alpha, TBAR Targets E-Commerce, and Michael Stollaire! — Ste... Page 8 of 14

steemit
beta (/)

Q.) What are Turnkey payments?

New login (/login.html) Sign up

(/trending/cryptocurrency)

(/https://steemit.com)

•E-commerce platforms, webshops and websites can implement turnkey payment systems with a few clicks.

•It's not just simple plugins, if someone sells a bike for 500 USD then the seller will receive 500USD as value/TBAR regardless of current TBAR conversion rates.

•With automated conversion rate updates every ten minutes, a seller may be confident that their item will be exchanged for the current TBAR value therefore the seller always remains relatively safe.

Q.) How does Wordpress "power the Internet"?

•The internet consists of websites and webshops.

•30% of all sites and webshops out there are built with the open source CMS wordpress.

•Via POMA's payment gateway for wordpress and its e-commerce system called Woocommerce, TBAR token gains massively adoptive Utility via real world use.

Q.) What is a tipping and rewards program?

•Any website, webshop, or business directory based on wordpress and other CMS systems may reward contributors with TBAR.

•This program encourages peer to peer review and interaction via TBAR. Thus perpetuating positive content generation while introducing TBAR token to a massive demographic.

Q.) What value does the tipping/rewards program generate for TBAR token?

•Content lockers: If a website owner has premium content (such as news, DIY guides, payed content, etc.) they may choose for their content to remain partially or completely unavailable to those who have not

IaaS/PaaS Alpha

The IaaS and PaaS Alpha is currently in development and on track for a May completion. The baseline functionality is ongoing and we will be moving forward with it to develop the best product on the market today.

We will not be releasing the Alpha content to the public however, we will be constantly testing it internally and with trusted community partners. We will be opening the floor up to everybody with our PaaS Beta in December, which will display the capability of our IaaS Alpha and allow for tuning of our IaaS platform.

Check out our roadmap here: <https://www.tbis.io/roadmap>

Community Voice

Q: Amazon has recently launched Blockchain templates directly relating to their AWS. Aside from the reason of AWS running on a centralized proximity of data centers, please elaborate on why TBAR investors should not be worried.

A: AWS is launching a few templates to help people build Blockchain applications. This is a completely different offering that Titanium is working on in regards to IaaS and other product services. Blockchain is a big space with many different facets. Titanium is working on its own chain as well, which is also outside the scope of this new AWS offering.

- Richard Silver, Chief Operating Officer

Q: When will accurate details be listed on Coinmarketcap?

A: Today of course.

- Becky Jae, Community Manager

Trending

(/trending/cryptocurrency)

New login (/login.html)

Sign up

(/https://steemit.com/)

Q: Will your Blockchain be developed from another Blockchain, such as Cardano, or will it be from scratch?

A: Our Dedicated Blockchain will be developed from scratch to meet the Titanium ecosystem needs.

- Daniel Berezcki, Chief Technology Officer

Q: What Strategic Partnerships do you have to gain an edge on the competition and how are you marketing your products and services?

A: Titanium is always looking to increase our outreach through partnerships. Many of our partners are excited to test out the products and services that we are building as the future backbone of the internet. We have a lot of interest and have formalized an application process. If your company believes your product would be a good fit with our technologies, or are wanting to get involved with our PaaS, please contact us around the end of our beta period.

- Richard Silver, Chief Operating Officer

Q: When can we expect a high volume exchange listing?

A: Exchange listings are important. They allow for greater exposure and the opportunity for more people to buy into the TBIS ecosystem. Exchange listings also generate trade volume which is often used to rank tokens and considered an indicator of success. The process of selection and applying to list on exchanges presents a host of environmental and political considerations. Exchanges often charge large fees to list tokens without

performing proper due diligence into the viability of the project. **Sign up** company behind them, some also require specific trade papers and **not** other assorted considerations.

As such, some exchanges offer faster listing but higher risk to consumers. While we most certainly want TBAR to be listed on many outstanding exchanges quickly, we must also go about doing this properly.

Titanium is building a closed Blockchain ecosystem with many well planned and revolutionary products for its native Token; TBAR. Large exchanges will take a very close look at the viability of a Utility Token like TBAR via the team behind it and the development of the products/services that it will be used for. Additionally they will scrutinize whitepapers, roadmaps, press, and social media. It is imperative that Titanium present a fully developed package when applying for such listings. This is one of the reasons why you see us building our brand, collateral materials, and maintaining a well-groomed Telegram chat now as we believe our products will soon speak for themselves. When the time comes for Titanium to apply to larger exchanges, we will be poised and professional, and clearly one of the best Blockchain companies in the world. With our revolutionary products, both completed and those under development, there will be no stopping us.

- Martha Breed, Chief Communications Officer

Hello Everyone!

This week we are grateful to our partners with whom we will break boundaries and write the definition of leadership for emerging technology. Collaboration and community will become the revolution. As always, we have selected the best submissions for response in our Community Voice section. This is a favorite activity for Team Titanium, and we appreciate the time and thought from our community members. We want to take a moment to remind our token holders that Community Voice is an opportunity to ask Team Titanium about our products, company, and partners, among many other things. We cannot provide answers to all questions, and thus will not answer questions commonly answered within our Telegram chat.

Moving forward, TBIS Weekly will be released every Monday instead of every Friday. This will allow for weekend updates and provide a great TBIS kick off to every week.

Submit questions for next week's TBISW here:

<https://goo.gl/bX4F11>

Titanium Team Spotlight

Hailing from the great white north, we have the pleasure of introducing Tina Mitchell as the newest member of the TBIS team! Mrs. Mitchell brings her experience, sharp eye and enthusiasm to Titanium as a much needed Copy Editor to ensure that all our written material is in top shape. Along with her editorial duties, Mrs. Mitchell has taken over scheduling

duties, utilizing her organizational skills and attention to detail to keep the team on schedule and moving forward. As a proud French Canadian, she is helping TBIS on the road to becoming a force on the world stage.

New Exchange

We are excited to announce that TBAR will be listed on a well known exchange soon. We will make an official announcement after TBAR is live on their platform.

While we are unable to provide the name of this exchange until live listing, we would still like to provide some background information. First, the exchange is not Binance, however their platform provides a wide variety of services to its users, from individuals to enterprise level organizations. With these services, many altcoins and mainstream digital currencies are paired for millions of dollars in trade volume daily. This platform is best know for casual trading, in a relaxed and social space. We think that TBAR token holders will enjoy their unique platform feature that allows for price comparison between listings on other exchanges and are pleased to have been given the opportunity to bring TBAR to this world class platform.

Discord: <https://discord.gg/vZWYAsS>

Twitter: https://mobile.twitter.com/bitcoin_token

Facebook: <https://www.facebook.com/btktoken/>

Q: What is Bitcoin Token?

A: Bitcoin Token (BTK) is an open source decentralized cryptocurrency much like Bitcoin. Conversely, BTK is an ERC20 token, developed on the Ethereum Blockchain to offer a faster, more efficient, and easily attainable solution to Peer-to-Peer (P2P) trading.

Q: Why is Bitcoin Token Open Source?

A: The vision is to accomplish a digital currency where people come first. By open-sourcing their project, Bitcoin Token Engineers have established a place for community voice in the development of their coin. BTK is, in

essence, a cryptocurrency by the people, for the people
steemit
beta (/)

Trending

(/trending/cryptocurrency)

Log in (/login.html)

Sign up

(/https://signup.steemit.com/)

Q: How will Bitcoin Token Be Applied?

A: The Bitcoin Token community is focused on engaging like minded projects for the purpose of mass adoption and world wide accessibility to Blockchain technology. One example is integration with Project POMA's E-commerce platform where BTK and TBAR tokens will both establish real life use cases. Bitcoin Token cites high transaction fees for businesses using centralized resources as a longstanding problem, solvable via world wide accessibility to educational resources on emerging technologies as well as mass adoptive techniques. With fees as low as \$0.02 compared to PayPal's standard business rate of 2.9%, Bitcoin Token is an integral part of a complex solution.

Q: How do I get Bitcoin Token (BTK)?

A: BTK is distributed via Airdrop in many creative ways and also available to purchase. Join BTK's Telegram community (<https://t.me/btkcommunity>) and follow them on twitter to learn more:
https://mobile.twitter.com/bitcoin_token .

Q: Will TBAR token holders receive BTK?

A: We'll ask Martha and get back to you!

IaaS/PaaS Alpha Q&A Trending (/trending/cryptocurrency) New login (/login.html) Sign up (/signup/steemit.com/#/bt)

Unsurprisingly, we received many questions this week regarding our IaaS and PaaS Alpha. Titanium's Chief Technology Officer, Daniel Berezcki, has taken some time away from product development to personally address frequently asked questions taken from our community:

Q: In the roadmap it says community members will be able to test the Alpha, can you be more specific on this?

A: The Private Alpha participation is meant for the Titanium community partners to ensure any integration issues are worked out in advance. We apologise for any confusion on that front.

Q: Will you keep us updated with the progress of the Alpha?

A: Yes of course! Our roadmap states that the Alpha phase will run through till the end of June so we'll have plenty of updates in TBIS weekly to keep y'all up to date on our progress.

Q: Are you on track to complete the Alpha on time?

A: Yes, we're well on track. We have a good rough proof of concept that our developers are using as a base for building out the feature sets.

Q: Hi Dan, do you think it's possible to release a video of our team using the Alpha, something that wouldn't compromise our (private/public) it.com) we can at least know the gift wrap color of our Christmas present?

A: Two month Alpha phase means two months of presents!

Q: Where will you post these Alpha updates?

A: Our updates will be included within our TBIS Weekly newsletters.

Q: Why would testing plans change?

A: Testing comes in all shapes and sizes. Just a conversation between a tester, a developer and a business analyst counts as testing. You don't always see progress immediately as there is lots of planning involved. In Agile development, testing starts at the beginning of the progress so it's not always clear what's ready, what's acceptable and what's done. It evolves.

Please check [TBIS.io/whitepaper](https://tbis.io/whitepaper) and [TBIS.io/roadmap](https://tbis.io/roadmap) for more information.
